### **Industry Review**

In 2019, airlines continued to increase the number of city-pair routes globally and more than 22,000 city pairs were serviced in 2019. Strong improvements in connectivity and inflation adjusted costs over the last few years helped to ensure that aviation, the "business of freedom", continues to distribute its array of benefits to consumers, suppliers and economies globally.

### **Business Review**

'Revenue' for six months ended June 2019 witnessed a significant growth of 44.6% as compared to 2018 and accordingly 'Loss from Operations' reduced by 59.4% as compared to 2018. This is a significant achievement and result of extensive hard work & new initiatives by current management. Passenger seat factor was 84.1% in 2019 as compared to 77.7% in 2018. While the operating loss improved, the Company got severe hit due to currency devaluation and rising interest rates.

Management is focusing on increasing the customer base of the Airline by enhancing the on-board passenger comfort on our flights. A number of new initiatives have been taken in this regard. Cabin refurbishment of entire fleet and improved in-flight meals are just to name few. Moreover, extensive Special trainings are being imparted to our cabin crew to augment their capacity to serve our valued customers even better. In addition to the above initiatives, Management is also focusing on route rationalization, with an aim to increasing the frequencies on route giving better yields, while curtailing not so profitable sectors.

The operating environment in the region remains challenging, however, with the current revitalization plan being implemented across the organization, we are hopeful that, with support of our customers, dedication of our employees and continued support of Government of Pakistan, we will emerge stronger for the better times ahead.

For and on behalf of the Board.

## INDEPENDENT AUDITOR'S REPORT ON REVIEW OF UNCONSOLIDATED CONDENSED INTERIM FINANCIAL INFORMATION TO THE MEMBERS OF PAKISTAN INTERNATIONAL AIRLINES CORPORATION LIMITED

### Introduction

We have reviewed the accompanying unconsolidated condensed interim statement of financial position of Pakistan International Airlines Corporation Limited ("the Company") as at June 30, 2019 and the related unconsolidated condensed interim statement of profit or loss, unconsolidated condensed interim statement of comprehensive income, unconsolidated condensed interim statement of cash flows, unconsolidated condensed interim statement of changes in equity and notes to the unconsolidated condensed interim financial information for the six-month period then ended (here-in-after referred as the "interim financial information"). Management is responsible for the preparation and presentation of this interim financial information in accordance with approved accounting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on this interim financial information based on our review.

### Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity." A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unconsolidated condensed interim financial information as at and for the six-month period ended June 30, 2019 is not prepared, in all material respects, in accordance with approved accounting standards as applicable in Pakistan for interim financial reporting.

### Emphasis of matter

We draw attention to the following:

- i. Note 1.2 to the unconsolidated condensed interim financial information which inter-alia states that in view of the financial position of Company, the Government of Pakistan has confirmed to extend necessary financial support to the Company to maintain its going concern status. Hence, the sustainability of the future operations of the Company is materially dependent on the said support.
- ii. Notes 10.2 and 11 to the unconsolidated condensed interim financial information which state that an aggregate amount of Rs. 17,320.93 million was payable to the Pakistan International Airlines Corporation Provident Fund (the Provident Fund) representing Rs. 10,960.835 million on account of the Company and employees' contributions and Rs. 6,342.090 million being markup payable thereon. However, the said amount was not deposited within the stipulated time of fifteen days to the Provident Fund as required under Section 218 of the Companies Act, 2017.

*GTAR*

- iii. Notes 18 and 19.1 to the unconsolidated condensed interim financial information which state that the Company is exposed to various tax and other contingencies aggregating to Rs. Rs. 44,747.92 million, the ultimate outcome of which cannot presently be determined and, accordingly, no provision has been made by the management in respect of these contingencies in the unconsolidated condensed interim financial information.

Our conclusion is not modified in respect of the above matters.

**PAKISTAN INTERNATIONAL AIRLINES CORPORATION LIMITED**  
**NOTES TO AND FORMING PART OF THE UNCONSOLIDATED CONDENSED**  
**INTERIM FINANCIAL INFORMATION (UN-AUDITED)**  
**FOR THE SIX MONTHS PERIOD ENDED JUNE 30, 2019**

**1. LEGAL STATUS AND NATURE OF BUSINESS**

- 1.1 Pakistan International Airlines Corporation Limited ("the Company") was incorporated on January 10, 1955 under the Pakistan International Airlines Company Ordinance, 1955, which was subsequently repealed and replaced by the Pakistan International Airlines Company Act, 1956. With effect from April 19, 2016, the Company has been converted from a statutory company into a public limited company by shares, through Act No. XV of 2016 'The Pakistan International Airlines Company (Conversion) Act, 2016' (the Conversion Act) approved by the Parliament of Pakistan. The Conversion Act has repealed the Pakistan International Company Act, 1956 and the Company is now governed under the Companies Act, 2017 (The Act). According to the Conversion Act, all assets, rights, license, privileges and benefits of which the Company was entitled were transferred to the Company and the Company has assumed all liabilities and obligations of the Company. However, the management believes that in substance there is no change except for the legal status and application of provisions of the Act.

The principal activity of the Company is to provide commercial air transportation, which includes passenger, cargo and postal carriage services. Other activities of the Company include provision of engineering and allied services.

- 1.2 During the current period, the Company incurred a net loss of Rs. 37,892.369 million (June 30, 2018: Rs. 32,411.214 million) resulting in accumulated losses of Rs. 487,803.72 million as of June 30, 2019 (December 31, 2018: Rs. 437,696.479 million). Further, as of June 30, 2019, current liabilities of the Company exceeded its current assets by Rs. 288,844.179 million (December 31, 2018: Rs. 253,624.252 million).

In view of the situation described above, the management has made an assessment of the Company's ability to continue as a going concern and based on the below mitigating factors, the management believes that though the sustainability of the future operations of the Company is materially dependent on the support of the Government of Pakistan (GoP), no material uncertainty exists and going concern assumption is appropriate. Accordingly, this unconsolidated condensed interim financial information is prepared on a going concern basis.

- a) GoP, being a major shareholder of the Company, through its letter dated September 02, 2008 and February 19, 2018 communicated that it would extend maximum support to maintain the Company's going concern status.
- b) In a meeting with the Honorable Prime Minister of Pakistan (PM) on December 30, 2017, following decisions / steps have been taken by the GoP to support the Company:

630

- approval for reimbursement of markup for five years, accordingly an amount of Rs. 16,019 million has been provided by GoP upto June 30, 2019.
  - GoP guarantee limit enhanced from Rs.178,085 million to Rs 222,107 million to meet the cash deficit.
- (c) Further, in a meeting with PM on April 4, 2019, the Company presented its strategic business plan 2019-23 and during that meeting PM assured GoP's full support to the Company in terms of provision of funds /equity in order to increase its potential to compete in the Aviation market. Thereafter, in Finance Act 2019, GoP has allocated Rs. 24,500 million in respect of mark-up support to the Company.

#### 3.1 New accounting standards

The Company has adopted the following standards, amendments and interpretations to International Financial Reporting Standards (IFRSs) which became effective for the current period:

IFRS 9 - Financial Instruments

IFRS 15 - Revenue from Contracts with Customers

IFRS 16 - Leases

IAS 19 - Employee Benefits: Plan Amendment, Curtailment or Settlement (Amendment) IAS 28

##### 3.1.1 IFRS 9 - Financial instruments

Effective from January 1, 2019, the Company has adopted IFRS 9, 'Financial instruments' which has replaced IAS 39, 'Financial instruments: recognition and measurement'. The standard has also introduced a new impairment model for financial assets which requires recognition of impairment charge based on 'expected credit losses' (ECL) approach rather than 'incurred credit losses' approach, as previously given under IAS 39. The ECL has an impact on the assets of the Company which are exposed to credit risk.

The Company has adopted IFRS 9 from January 1, 2019 which resulted in changes in accounting policies, reclassifications and adjustments to the amounts recognised in this unconsolidated condensed interim financial information. However, in accordance with the transitional provisions specified in IFRS 9, the Company has adopted modified retrospective approach and not restated comparative figures. The impact of adoption of this standard is therefore recognised in the statement of financial position and retained earnings on January 1, 2019.

The nature and effect of the changes as a result of the adoption of IFRS 9 are as follows:

## **Financial assets**

### **Classification and subsequent measurement**

In accordance with IFRS-9, the Company has classified its financial assets in the following measurement categories:

- at amortised cost;
- at fair value through other comprehensive income (FVOCI); and
- at fair value through profit or loss (FVPL).

#### **a) At amortized cost**

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at FVPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured are described below.

#### **b) At fair value through other comprehensive income (FVOCI)**

Investments in equity instruments classified at FVOCI are initially recognized at fair value plus transaction costs. Subsequently, they are measured at fair value, with gains or losses arising from changes in fair value recognized in other comprehensive income/(loss). For investments traded in active market, fair value is determined by reference to quoted market price.

#### **c) At fair value through profit or loss (FVPL)**

Financial assets that do not meet the criteria for classification at amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in the statement of profit or loss in the period in which it arises.

## Financial liabilities

There is no significant change in classification, measurement and recognition of financial liabilities as a result of IFRS 9.

## Impairment

The Company assesses on a forward-looking basis the expected credit losses (ECL) associated with its debt instrument assets carried at amortised cost and FVOCI. Expected credit losses (ECLs) are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between cash flows due to the entity in accordance with the contract and cash flows that the Company expects to receive). The Company recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The following tables show the adjustments recognised for each individual line item. Line items that were not affected by the changes have not been included.

The difference has arisen due to implementation of expected credit loss model over the financial assets. The reclassification change upon implementation of IFRS 9 did not result in any adjustment to amount recognised in the statement of financial position.

The impact of transition to IFRS 9 on retained earnings and revaluation reserve as on January 01, 2019 is as follows:

The adoption of IFRS 9 resulted in increase in 'Other provisions and adjustments - net' and loss before tax of Rs 76.012 million. The change in accounting Policy also resulted in increase in loss after tax by Rs. 76.012 million and decrease in EPS by Re. 0.01521.

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade debts. To measure the expected credit losses, trade debts have been grouped based on days past due. On that basis, the loss allowance as at January 1, 2019 (on adoption of IFRS 9) and as at June 30, 2019 was determined as follows for trade debts:

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade debts. To measure the expected credit losses, trade debts have been grouped based on days past due. On that basis, the loss allowance as at January 1, 2019 (on adoption of IFRS 9) amounted to Rs. 3.991 billion and loss allowance as at June 30, 2019 amounted to Rs. 4.067 billion.

### 3.1.2 IFRS 15 - Revenue from Contracts with Customers

IFRS 15 - 'Revenue from Contracts with Customers', supersedes IAS 11 'Construction Contracts', IAS 18 'Revenue' and related interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. IFRS 15 introduces a single five-step model for revenue recognition and establishes a comprehensive framework for recognition of revenue from contracts with customers based on a core principle that an entity should recognise revenue when the control of goods or services have been transferred to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

6/10

Contract liabilities are included within trade and other payables on the face of the statement of financial position. They arise from the customers, which enter into contract that can take few years to complete, because cumulative payments received from customers at date of each statement of financial position do not necessarily equal the amount of revenue recognised on the contracts.

The Company elected the modified retrospective method and applied the standard retrospectively to only the most current period presented in the unconsolidated condensed interim financial information. Accordingly, the information presented for the corresponding period has not been restated. There were no material differences between revenue recognition under IFRS 15 and revenue recognition under IAS 11 or IAS 18 and accordingly, the adoption of standard did not have any material impact on this unconsolidated condensed interim financial information.

### 3.1.3 IFRS 16 - Leases

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases under IFRS 16, distinction between operating and finance leases has been removed and all lease contracts, with limited exceptions.

The Company has adopted IFRS 16 from January 1, 2019, and has adopted modified retrospective approach and not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The impact of adoption of this standard is therefore recognised in the opening statement of financial position and retained earning on January 01, 2019.

On adoption of IFRS 16, the Company recognised lease liabilities which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the Company's incremental borrowing rate as of January 1, 2019. The lessee's incremental borrowing rate applied to the lease liabilities on January 1, 2019 ranges between 3.41% - 9.88% for foreign currency based liabilities and between 12.14% - 15.17% for PKR based liabilities.

#### Lease liability and Right-of-use asset

The Company mainly leases aircrafts, engines, local and international sales offices, and counters at various airports. At inception of a contract, the Company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate.

bdo

Lease payments include fixed payments, variable lease payment that are based on an index or a rate amounts expected to be payable by the lessee under residual value guarantees, the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option, less any lease incentives receivable. The extension and termination options are in Company's determination of lease term only when the Company is reasonably certain to exercise these options.

The lease liability is subsequently measured at amortised cost using the effective interest rate method. It is remeasured when there is a change in future lease payments arising from a change in fixed lease payments or an index or rate, change in the Company estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. The corresponding adjustment is made to the carrying amount of the right-to-use asset, or is recorded in profit or loss if the carrying amount of right-to-use asset has been reduced to zero.

The right-of-use asset is initially measured at the commencement date of lease based on the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset, less any lease incentive received. The right-of-use asset is depreciated on a straight line method over the lease term as this method most closely reflects the expected pattern of consumption of future economic benefits. The right-of-use asset is reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company has elected to apply the practical expedient not to recognise right-of-use assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low-value assets. The lease payments associated with these leases is recognised as an expense on a straight line basis over the lease term.

The impact of transition to IFRS16 on unconsolidated condensed interim financial information as on January 01, 2019 is as follows:

**Practical Expedients applied**

In applying IFRS 16 for the first time, the Company has used the following practical expedients permitted by the standard:

hdo

- grandfathered the assessment of which transactions are lease on the date of initial application;
- reliance on previous assessments on whether leases are onerous
- the accounting for operating leases with a remaining lease term of less than 12 months as at January 01, 2019 as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

### 3.2 Significant accounting estimates and judgements

Estimates and judgments made by the management in the preparation of this unconsolidated condensed interim financial information are the same as those applied in the preparation of the annual unconsolidated financial statements of the Company for the year ended December 31, 2018 except as follows:

As part of the adoption of IFRS, the Company has made a number of estimates and judgements.. These include;

- As disclosed in note 3.1.2, the Company has used modified retrospective transition approach and has measured right of use assets and lease liabilities accordingly.
- The Company has identified certain obligations associated with the maintenance condition of its aircraft on redelivery to the lessor, such as the requirement to complete a final airframe check, repaint the aircraft and reconfigure the cabin. These have been recognised as part of the ROU asset on transition. Judgement has been used to identify the appropriate obligations and estimation has been used (based on observable data) to measure them. Other maintenance obligations associated with these assets, comprising obligations that arise as the aircraft is utilised, such as engine overhauls and periodic airframe checks, will continue to be recognised as a maintenance expense over the lease term.
- For certain aircrafts, the Company has an option to purchase the aircrafts as at the end of the lease term. The management believes that it is not reasonably certain to exercise the purchase option at the end of lease term, and accordingly corresponding impacts have not been taken in the determination of Right of Use Assets and lease liabilities.

- 6.1 This includes sales tax refundable aggregating Rs. 4,745.637 million (December 31, 2018: Rs. 4,745.637 million) representing unadjusted portion of input tax under Sales Tax Act, 1990 (the Act). The Company had filed application for refunds of input sales tax up to December 31, 2011. In response, ACIR, Large Taxpayers Unit (LTU) concluded that as the Company is engaged in both domestic and international air travel, therefore, input tax paid is adjustable only against the domestic air travel services as no input tax adjustment is allowed against the international air travel services.

However, the Company in consultation with its tax advisor believes that apportionment rule is not applicable in the subject case inter alia, at first instance, no sales tax was required to be collected at import stage on capital goods (spares / engines / aircraft) in view of the exemption available under entry No. 16 of SRO 575(1)/2006, which is applicable to the Company being registered as a Service Provider in transportation business and registered as service provider under the Act. The management has represented its view to the tax authorities and is confident that sales tax was not payable on such imports and the amounts collected from the Company at the import stage shall be eventually recovered / adjusted.

- 6.2 This represents receivable from lessor in respect of overhauling incurred by the Company on leased aircrafts.

IFRS 16 - Leases

IAS 19 - Employee Benefits: Plan Amendment, Curtailment or Settlement (Amendment) IAS 28

IAS 28 - Investments in associates and joint ventures: Long-term interest in Associates and Joint Ventures (Amendments)

IFRIC 23 - Uncertainty over income tax treatments

The Holding Company applied IFRS 9, IFRS 15 and IFRS 16 for the first time. The nature and effect of the changes as a result of adoption of these new accounting standards are described below.

#### 3.1.1 IFRS 9 - Financial instruments

Effective from January 1, 2019, the Holding Company has adopted IFRS 9, 'Financial instruments' which has replaced IAS 39, 'Financial instruments: recognition and measurement'. The standard addresses recognition, classification, measurement and derecognition of financial assets and financial liabilities. The standard has also introduced a new impairment model for financial assets which requires recognition of impairment charge based on 'expected credit losses' (ECL) approach rather than 'incurred credit losses' approach, as previously given under IAS 39. The ECL has an impact on the assets of the Holding Company which are exposed to credit risk.

The Holding Company has adopted IFRS 9 from January 1, 2019 which resulted in changes in accounting policies, reclassifications and adjustments to the amounts recognised in this Consolidated condensed interim financial information. However, in accordance with the transitional provisions specified in IFRS 9, the Holding Company has adopted modified retrospective approach and not restated comparative figures. The impact of adoption of this standard is therefore recognised in the statement of financial position and retained earnings on January 1, 2019.

The application of IFRS 9 resulted in the following changes in categories of financial instruments:

#### Financial assets

##### Classification and subsequent measurement

The Holding Company has applied IFRS 9 and classifies its financial assets in the following measurement categories:

- at amortised cost;
- at fair value through other comprehensive income (FVOCI); and
- at fair value through profit or loss (FVPL).

Based on these factors, the Holding Company classifies its financial assets in one of the following three measurement categories:

##### a) At amortized cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at FVPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured as described below.

##### b) Fair value through other comprehensive income (FVOCI)

Investments in equity instruments at FVOCI are initially recognized at fair value plus transaction costs. Subsequently, they are measured at fair value, with gains or losses arising from changes in fair value recognized in other comprehensive income/(loss). For investments traded in active market, fair value is determined by reference to quoted market price.

##### c) Fair value through profit or loss (FVPL)

Assets that do not meet the criteria for classification at amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in the statement of profit or loss in the period in which it arises.

#### Financial liabilities

There is no significant change in classification, measurement and recognition of financial liabilities.

##### Impairment

The Holding Company assesses on a forward-looking basis the expected credit losses (ECL) associated with its debt instrument assets carried at amortised cost and FVOCI. Expected credit losses (ECLs) are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between cash flows due to the entity in accordance with the contract and cash flows that the Holding Company expects to receive). The Holding Company recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The following tables show the adjustments recognised for each individual line item. Line items that were not affected by the changes have not been included.

The difference has arisen due to implementation of expected credit loss model over the financial assets. The reclassification change upon implementation of IFRS 9 did not result in any adjustment to amount recognised in the statement of financial position.

The impact of transition to IFRS 9 on retained earnings and revaluation reserve as on January 01, 2019 is as follows:

The adoption of IFRS 9 resulted in increase in 'Other provisions and adjustments - net' and loss before tax of Rs 76.012 million. The change in accounting Policy also resulted in increase in loss after tax by Rs. 76.012 million and decrease in EPS by Rs. 0.01521.

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade debts. To measure the expected credit losses, trade debts have been grouped based on days past due. On that basis, the loss allowance as at January 1, 2019 (on adoption of IFRS 9) and as at June 30, 2019 was determined as follows for trade debts:

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade debts. To measure the expected credit losses, trade debts have been grouped based on days past due. On that basis, the loss allowance as at January 1, 2019 (on adoption of IFRS 9) amounted to Rs. 3.991 billion and loss allowance as at June 30, 2019 amounted to Rs. 4.067 billion.

### 3.1.2 IFRS 15 - Revenue from Contracts with Customers

IFRS 15 - 'Revenue from Contracts with Customers', supersedes IAS 11 'Construction Contracts', IAS 18 'Revenue' and related interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. IFRS 15 introduces a single five-step model for revenue recognition and establishes a comprehensive framework for recognition of revenue from contracts with customers based on a core principle that an entity should recognise revenue when the control of goods or services have been transferred to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The Holding Company elected the modified retrospective method and applied the standard retrospectively to only the most current period presented in the financial statements. Accordingly, the information presented for the corresponding period has not been restated. There were no material differences between revenue recognition under IFRS 15 and revenue recognition under IAS 11 or IAS 18 and accordingly, the adoption of standard did not have any material impact on the financial statements.

### 3.1.3 IFRS 16 - Leases

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases under IFRS 16, distinction between operating and finance leases has been removed and all lease contracts, with limited exceptions.

The Holding Company has adopted IFRS 16 from January 1, 2019, and has adopted modified retrospective approach and not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The impact of adoption of this standard is therefore recognised in the opening statement of financial position and retained earning on January 01, 2019.

On adoption of IFRS 16, the Holding Company recognised lease liabilities which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the Holding Company's incremental borrowing rate as of January 1, 2019. The lessee's incremental borrowing rate applied to the lease liabilities on January 1, 2019 ranges between 3.41% - 9.88% for foreign currency based liabilities and between 12.14% - 15.17% for PKR based liabilities.

### Lease liability and Right-of-use asset

The Holding Company mainly leases aircrafts, engines, local and international sales offices, and counters at various airports. At inception of a contract, the Holding Company assesses whether a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Holding Company's incremental borrowing rate.

Lease payments include fixed payments, variable lease payment that are based on an index or a rate amounts expected to be payable by the lessee under residual value guarantees, the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option, less any lease incentives receivable. The extension and termination options are in Holding Company's determination of lease term only when the Holding Company is reasonably

The lease liability is subsequently measured at amortised cost using the effective interest rate method. It is remeasured when there is a change in future lease payments arising from a change in fixed lease payments or an index or rate, change in the Holding Company estimate of the amount expected to be payable under a residual value guarantee, or if the Holding Company changes its assessment of whether it will exercise a purchase, extension or termination option. The corresponding adjustment is made to the carrying amount of the right-to-use asset, or is recorded in profit or loss if the carrying amount of right-to-use asset has been reduced to zero.

The right-of-use asset is initially measured at the commencement date of lease based on the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset, less any lease incentive received. The right-of-use asset is depreciated on a straight line method over the lease term as this method most closely reflects the expected pattern of consumption of future economic benefits. The right-of-use asset is reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Holding Company has elected to apply the practical expedient not to recognise right-of-use assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low-value assets. The lease payments associated with these leases is recognised as an expense on a straight line basis over the lease term.

The impact of transition to IFRS16 on Consolidated condensed interim financial information as on January 01, 2019 is as follows:

|                                         | June 30, 2019              | January 01, 2019  |

| <b>Total lease liability recognised</b> | <b>33,729,004</b>          | <b>34,711,844</b> |

The right-of use assets were measured on retrospective basis from the commencement of the respective lease arrangements.

The recognised right-of-use assets relate to the following types of assets:

|                                  |                   |                   |

**Practical Expedients applied**

In applying IFRS 16 for the first time, the Holding Company has used the following practical expedients

In applying IFRS 16 for the first time, the Holding Company has used the following practical expedients permitted by the standard:

- grandfathered the assessment of which transactions are lease on the date of initial application;
- reliance on previous assessments on whether leases are onerous
- the accounting for operating leases with a remaining lease term of less than 12 months as at January 01, 2019 as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

**3.2 Significant accounting estimates and judgements**

Estimates and judgments made by the management in the preparation of this Consolidated condensed interim financial information are the same as those applied in the preparation of the annual Consolidated financial statements of the Holding Company for the year ended December 31, 2018 except as disclosed below:

As part of the adoption of IFRS, the Holding Company has made a number of estimates and judgements.. These include;

As disclosed in note 3.1.2, the Holding Company has used modified retrospective transition approach and has measured right of use assets and lease liabilities accordingly.

The Holding Company has identified certain obligations associated with the maintenance condition of its aircraft on redelivery to the lessor, such as the requirement to complete a final airframe check, repaint the aircraft and reconfigure the cabin. These have been recognised as part of the ROU asset on transition. Judgement has been used to identify the appropriate obligations and estimation has been used (based on observable data) to measure them. Other maintenance obligations associated with these assets, comprising obligations that arise as the aircraft is utilised, such as engine overhauls and periodic airframe checks, will continue to be recognised as a maintenance expense over the lease term.

For certain aircrafts, the Holding Company has an option to purchase the aircrafts as at the end of the lease term. The management believes that it is not reasonably certain to exercise the purchase option at the end of lease term, and accordingly corresponding impacts have not been taken in the determination of Right of Use Assets and lease liabilities.

5.1 This includes sales tax refundable aggregating Rs. 4,745.637 million (December 31, 2018: Rs. 4,745.637 million) representing unadjusted portion of input tax under Sales Tax Act, 1990 (the ST Act). The Holding Company had filed application for refunds of input sales tax up to December 31, 2011. In response, ACIR, Large Taxpayers Unit concluded that as the Holding Company is engaged in both domestic and international air travel, therefore, input tax paid is adjustable only against the domestic air travel services as no input tax adjustment is allowed against the international air travel services. However, the Holding Company in consultation with its tax advisor believes that apportionment rule is not applicable in the subject case inter alia, at first instance, no sales tax was required to be collected at import stage on capital goods (spares / engines / aircraft) in view of the exemption available under entry No. 16 of SRO 575(1)/2006, which is applicable to the Holding Company being registered as a Service Provider in transportation business and registered as service provider under the Act. The management has represented its view to the tax authorities and is confident that sales tax was not payable on such imports and the amounts collected from the Holding Company at the import stage shall be eventually recovered / adjusted.

5.2 This represents receivable from lessor in respect of overhauling incurred by the Holding Company on leased aircrafts.
